# HYDRAULIC ENGINEERING

Precision Engineering  
With A Real Value Driven  
Difference.

Here at Southpole Engineering we are focused on consistent growth and development within our field of expertise in general engineering as well as Hydraulic Engineering.

## Hydraulic Ram Manufacturing:

Southpole Engineering source and manufacture only the best CK45 chrome bars; used in our hydraulic ram manufacturing process. Our engineering facility is well suited for all size cylinders with full testing to ISO standards & specifications done in house.

## Hydraulic Ram Repairs:

We offer repair and full refurbishment of your hydraulic rams, which are subsequently tested in our test facility to ensure quality and reliability. All repair work is carried out by our qualified and experienced artisans, and carry the same comprehensive warranty as our high quality manufactured hydraulic equipment.

## Repair & Testing Of Hydraulic Pumps

Here at Southpole Engineering we understand the critical role hydraulic systems play in your industry. We provide you with specialist hydraulic pump repair services, restoring the power and efficiency of your machinery.
